Experience

CitiusTech (Client: GE HealthCare)

March 2025 – Present

Software Developer

Mumbai, India

- Developing a high-performance, web-based medical image viewer for GE HealthCare, a top global medical technology company, using TypeScript, Angular, and JavaScript, with containerized deployments via Docker and Kubernetes.
- Built advanced clinical measurement and annotation tools, including Cobb angle, elliptical ROI, and other geometry-based tools, enabling radiologists to perform precise on-image diagnostic measurements.
- Implemented Mammography CAD SR (DICOM Structured Report) support, parsing and rendering CAD findings as overlays on mammography images to assist in early detection workflows.
- Optimized the image rendering pipeline to achieve single-slice load times in milliseconds, significantly improving radiologist reading speed and user experience.
- Designed and developed reusable, accessible UI components for the viewer, ensuring a consistent look and feel across the product.
- Enabled third-party interoperability by integrating the viewer with external hospital systems such as Epic (EHR), allowing seamless cross-application clinical workflows.
- Accelerated team delivery and audit-readiness by integrating Rally, requirements management, and Figma into the development workflow, reducing manual tracking effort and turnaround time.

NEC Software Solutions

June 2022 – February 2025

Software Developer (Full Stack)

Mumbai, India

- Developed a cross-platform Housing Management application (web, Android, iOS) using Angular and Ionic, delivering consistent functionality and UI across all platforms.
- Contributed to a web-based medical imaging platform built on the open-source OHIF Viewer (React), and built a companion hybrid mobile app for surgeons using Angular/Ionic.
- Developed RESTful web APIs using Express.js, applying best practices such as caching to improve response times and scalability.
- Wrote comprehensive unit tests and collaborated with cross-functional teams of developers, designers, and testers to deliver projects within tight deadlines.

Education

Mumbai University

July 2018 – May 2022

Bachelor of Science in Computer Science

Mumbai, India

Projects

YT AI Companion – On-Device AI Chrome Extension | TypeScript, Gemini Nano, ONNX | [Chrome Web Store](#)

- Built and published a Chrome extension that turns any YouTube video into an interactive learning tool, with a side panel offering AI-generated summaries, auto-generated multiple-choice quizzes, and multi-turn Q&A grounded in the video's transcript.
- Engineered the entire AI pipeline to run fully on-device using Chrome's built-in Gemini Nano (Prompt API), with a local embedding model and ONNX Runtime for transcript retrieval – no servers, API keys, or data leaving the browser, ensuring complete privacy and offline capability.

Paint-GitHub-Contribution-Graph | Rust | github.com/AwaisIsane/Paint-GitHub-Contribution-Graph

- Built a terminal user interface (TUI) in Rust to draw custom pixel-art patterns on the GitHub contribution graph by programmatically generating backdated commits.

Technical Skills

Languages: TypeScript, JavaScript, Python, Rust, SQL

Frameworks: Angular, React.js, Ionic, Node.js, Express.js, PyTorch

Technologies: Docker, GraphQL, WebGL, RAG, Vector Databases, DICOM, OHIF Viewer

Certification: [Deep Learning Specialization](#) – DeepLearning.AI (Coursera)
